Credit Score

The Credit Score predicts the probability of a consumer defaulting in the first 12 months after opening an account. Defaulting is defined as going 3 or more months in arrears on their account, including adverse status codes. A single score is calculated for each consumer and the score represents the risk associated with that consumer.

The Credit Score ranges from 400 to 1000. The lower the score, the more risky the consumer. The medium risk Presage Score for consumers is in the range of 700 - 720.

Credit Score

Score Date	Risk Category	Final Score
